Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 8, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Wortman et al. [US 6,447,135].

Regarding claim 8, Wortman et al. discloses a light guide plate [74] having a light guide body with a light output surface [72], a bottom surface [at layer 73], a light incident surface [66], a plurality of side surfaces [at 74 and cross section view], and a transfer material layer [71, 76] disposed on the bottom surface [at layer 73] together being formed into a unity (figure 8, column 5 lines 45-60).

Regarding claim 10, Wortman et al. discloses a light scattering patterned layer [71] (figure 8).

Art Unit: 2875

Regarding claim 11, Wortman et al. discloses a light scattering patterned layer [71] and a light reflecting layer [76] disposed over the bottom surface and covering the light scattering patterned layer [71] (figure 8).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wortman et al. in view of Wimberger-Friedl [US 5,845,035].

Regarding claim 12, Wortman et al. discloses a light guide with side surfaces [at 74] but does not clearly disclose the light reflecting layer being disposed on the side surfaces.

Wimberger-Friedl discloses a light guide [19] with a side surface [15] having a light reflecting layer [23] to prevent light exit at the side face [15] (figure 1, column 6 lines 40-52).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the side surface of the light guide of Wortman et al. with the light reflecting layer as taught by Wimberger-Friedl to prevent light leaving the light guide at the side surface for purpose of providing an advantageous way of increasing brightness.

Allowable Subject Matter

6. Claims 1-7 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 1, a method of fabricating a light guide comprises, in combination, a step of providing a thin film having a transfer material layer thereon, and forming a light guide plate body in side a cavity such that the transfer material layer is transferred on the light guide plate body.

Claims 2-7 are dependent on claim 1.

The limitations discussed above are neither disclosed nor suggested by the prior art of record.

Response to Amendment

7. Applicant's amendment and arguments with respect to the present claim have been considered but are moot in view of the new ground(s) of rejection. A new reference, Wortman et al., is applied.
